

who are we

Ceiling and Partition Systems Limited (CPS) was established when Lafarge Gypsum Tanzania, a leading supplier of interior construction solutions in Tanzania, had a need for a reliable installer of its ceiling and partition systems based in Tanzania.

However, when Lafarge Gypsum decided to close its operations in Tanzania, CPS took over the operations of Lafarge Gypsum Tanzania and become not only the installer but also the supplier of interior building solutions manufactured by Lafarge.

CPS has since evolved into a specialist in Ceiling and Partition Systems and has expanded to become a sole distributor of a comprehensive range of products and a specialist contractor for interior solutions.

We are suppliers, distributors and installers of internationally renowned companies such as: Lafarge Gypsum South Africa, Lafarge Boral-Asia, SCG Trading Co. Ltd, Hadley Group UK, Ifuba Products SA.

CPS has more than doubled its importation since its inception, reaching new suppliers as far as Turkey to China, forging new stable partnerships and this ensuring stable and alternative sources of supplies.

affordable, quality, time saving and stylish building solutions...

Ceiling and Partition Systems Limited (CPS) plans for the future includes extending its operational base from the Dar es Salaam region to other regions in Tanzania and hopes to have a countrywide presence by mid 2015. This expansion will also see us offering a larger diversified range of building solutions.

speed & quality ✓

The question of quality versus speed has always been a contentious one within the building interiors industry.

Economics and demand require buildings to go up **quickly** and **affordably** which could compromise projects. At CPS we stock solutions that address both **quality** and **speed**.

We pride ourselves on our **expertise** in offering our clients innovative solutions that address their specific requirements.

why choose us

At CPS we offer Building Solutions, we don't just sell building material. Our clients are our priority and our added value is extending our services to consulting with clients. We are **passionate** about sharing our expertise on why certain **building solutions** work better, where they should be used and how they should be used with detail and **commitment** to the outcome for our clients. Our service to our clients goes over and above just selling them building material.

Assisting our clients further with important things like technical specification, correct material take offs and efficient installation methods is what sets us apart from the competition and is an integral part of our business offering. We consider **reliability, quality** and **affordability** to be the key to the success of our business.

our vision and business strategy

CPS's aim is to be the chain of builder's depots and outlets located in the regions and neighborhoods offering building solutions to its clients including consulting and installation services. The CPS Builder's Depots and Outlets will supply tradesmen and contractors across a broad spectrum of building solutions with a main focus being on those traders and contractors constructing commercial and residential buildings, alterations, additions and renovations of any magnitude. This vision will be supported by significant credit facilities for approved contractors, flexible pricing on significant purchases, cost estimating, product advice, on site delivery as well as unique and professional construction and installation services. Our goal is to establish a chain of CPS Builder's Depots and Outlets in every region and new neighborhood in Tanzania starting in 2015.

our mission statement

Ceilings and Partition Systems Limited's mission is to offer technical advice, services and materials for interior solutions to builders, developers, contractors and architects.

our team

The CPS Team is composed of highly motivated, energetic, innovative, dynamic and professional staff with various skills.

The Team is led by the Managing Director Mr. Alex Matovu.

The CPS workforce has the following skills to deliver building solutions at residential, commercial and social buildings: architects, engineers, technicians, product specialists, accountants, lawyers, consultants, sales and marketing personnel, operations and warehousing staff. This pool of professionals are sourced locally and from our international strategic suppliers from South Africa, Turkey, Thailand and China.
