- 1200 x 2400 mm
- 1200 x 2700 mm

Slimline Acoustic Walling - Also available for glass applications:

A range of specially designed modular panels that are equipped with highly effective suction cups in conjunction with high tensile steel cabling which enables a positive fix for glass surfaces and have successfully been installed in fully glazed boardrooms, offices and meeting rooms. These panels can be beneficial for both solar shading and acoustic relief.

superior **acoustics, flexible** design
